We have never had one returned because the glaze was off from use, or changed in color, nor because tea or coffee changed in color or flavor; and it is the only serviceable pot ever made that will stand this test.

HYGIENIC COOKING.

The best preparation for Housekeeping is a Wire Gauze Door as used exclusively on the New Hub Range.

The Wire Gauze Oven Door.

Is the most important improvement ever placed on a cooking apparatus. The Gauze allows the outside air to be freely admitted to the oven; the food thus being surrounded by a pure heated atmosphere during the process of cooking. More bread and of a better quality can be produced from the same weight of flour than by any other known process, while meats that are roasted in this oven lose scarcely anything in weight and retain all their juices. Meats cooked well done are as juicy as those cooked rare and no basting is required. Tough meat is made tender and palatable, while loaves of bread are larger than those cooked in a close oven, and keep fresh for a longer time. Broiling can be done more perfectly than over the live coals.

Three of the New Hub Ranges with Wire Gauze Oven Doors are used by the Boston Cooking School for their Demonstration Lessons, being the only range used by them.

PREFACE.

In presenting to our patrons and the general public this edition of the Biddeford, Saco and Old Orchard Directory — No. 9 of the regular series — we would express the hope that it may meet every reasonable expectation. It is scarcely necessary to state that the difficulties and expenses attending the compilation of such a work are very great and not to be appreciated by any one unfamiliar with the business. The Directory business, like every other, is peculiar to itself.

It has been our sincere purpose and earnest endeavor to do our work faithfully, and in return, may we not ask the generous support of an undivided community? We call special attention to the advertising department in this edition, which will be found to be unusually large.

In Europe our different directories may be found on file at The American Exchange and Reading Room, 449 Strand, Charing Cross, London, W. C., and at 35 Boulevard des Capucines, Paris.

Our sincere thanks are extended to all who have aided our canvassers in the collection of information for the present number.

The following synopsis shows the number of names in the several communities in the last and the present edition :

	Biddeford.	Saco.	Old Orchard.
Names for 1888	4,613	2,332	533
" " 1886	4,511	2,401	580

We remain very respectfully,

W. A. GREENOUGH & CO.,

Population of the Earth.

PROF. E. LEVASSEUR has drawn up a long and elaborate series of tables of the population of the various continents and countries, and their sub-divisions.

The following are some of his results:—

	Area in thousands of square miles.	Percent of surface.	Population in millions.	Density per sq. mile.	Per cent of population
GREAT DIVISIONS.					
Arctic Ocean . .	4,632	2.5	. .	. .	. .
Antarctic	8,108	4.1	. .	. .	. .
Atlantic	38,612	19.6	. .	. .	. .
Indian	26,256	13.3	. .	. .	. .
Pacific	66,799	34.0	. .	. .	. .
The five Oceans	114,407	73.3	. .	. .	. .
Europe	3,861	2.0	347	90	23.4
Africa	12,124	6.1	197	16	13.3
Asia	16,217	8.2	789	47	53.2
Oceanica	4,247	2.2	38	9	2.6
North America .	9,035	4.6	80	8.8	5.4
South America .	7,066	3.6	32	4.6	2.1
Five land parts	52,550	26.7	1,483	29.2	100.
Total . . .	186,957	100.			

M. Levasseur also points out that nearly two-thirds of the human race are grouped on a relatively small area of 4,256,000 square miles (about one-twelfth of the land area), divided into three groups; Western, Central and Southern Europe (about 245,000,000 inhabitants and 1,351,000 square miles); the Indian Empire (245,000,000 inhabitants and 1,380,000 square miles); China proper with Manchuria and Japan (430,000,000 inhabitants and 1,544,500 square miles).

The most populous regions are found along the great rivers, in many cases on the coasts. Coal basins attract population far more than valleys, and great cities exercise a sort of magnetic, ar rather gravitating influence on people.

Pepperell Park is a tract of land of a number of acres, situated on the easterly side of the village, and was granted to the town, in 1752, by Sir William Pepperell. The donation of a part consisted of four acres "for building a meeting house, for a burying place, and for setting up a school house, and for no other use or end whatever." A still larger grant was made of land adjoining, by the same granter, "for a training field", etc. The Unitarian church, now occupied by Rev. J. T. G. Nichols, society, is situated on this grant.

The X-L-C-R or

IMPROVED CIRCUMSHOT WATER WHEEL,

ON HORIZONTAL SHAFT.

Saves cost, annoyance and loss of power incident to use of gears; and having the same superior qualities of the I-X-L, it makes an efficient and desirable motor, invariably proving satisfactory and popular.

SPECIAL X-S TURBINES, SMALL GREAT NOT ABLE IN DIAMETER CAPACITY EFFICIENCY

For situations where the limitation of space or cost is more important than the best results from the water. NOT RECOMMENDED FOR ECONOMY, as the excessive application of water to small wheels always involves loss of efficiency and is often very wasteful, particularly with low heads.

HUMPHREY'S IMPROVED ROTARY FORCE PUMP. The simplest and best Fire Pump made. No frail or trashy parts to wear rapidly and require special adjustment or fail in time of needed service. Throws nearly twice the quantity of water with same power of other standard pumps now in general use. THE BEST APPLIANCE FOR MOTIVE POWER AND FIRE PROTECTION. EVERY FIRST CLASS MILL SHOULD HAVE THEM.

THE I-X-L IS X-L-NT AND UN-X-L-D.

WIGHT'S CLEAR CRAYON PORTRAITS.

Studio of E. M. WIGHT, Saco, Maine.

I would respectfully call your attention to the peculiarties of WIGHT'S CLEAR CRAYON PORTRAITS celebrated for their fineness of finish and artistic execution; they are not solar prints, nor large photographs finished with crayon, but are executed without the use of chemicals, wholly by hand, with pure crayon, and upon the finest white paper, being thus rendered absolutely permanent.

In sending an order for a Portrait to be copied it is of course necessary to send the likeness to be copied from and the best one in regard to LIKENESS. For example, if you have a tintype that resembles the original more than some perhaps costlier photograph, then send the tintype, for you would get as good a portrait from a tintype as from any other picture, provided it is good. It is best to send an ambrotype or other picture in a case by express.

The prices are as follows:—For life size bust (head and shoulders), in a gilt frame, moulding about 2 1-2 x 3 1-2 inches, with gilt edge mat, and glass about 22 x 28 inches, $15.00. The same, finished to the waist, in a similar frame, glass about 25 x 30 inches, $20.00. A full length Portrait depends much on the subject, costing from $20.00 for a child to $50.00 for a grown person, and before ordering such Portrait it is best to write for further terms.

☞ TERMS—$5.00 on delivery; balance in instalments, if desired.

☞ Best of References on Application.
